The testing was conducted and evaluated by the expertise in communication, graphic design, education, and computer science. The findings of the research indicated that the game should be revised especially to be interesting. Revising the game based on the important suggestion in term:

- Can be added with the content of regional clothing, special food
- Need to re-analyze the user experience so that it is more flexible to play the game
- Game content is not animated. Can be added more animations and videos
- Color does not match East Nusa Tenggara characteristics. The appropriate color is dominated by red
- Add adventurous games with a background in tourist attractions in East Nusa Tenggara
- There are not many kinds of games. There are too many pieces of the puzzle around and not suitable for young children
- It may need to be a Hints / Help button and a scoring system
- Add information on how to play the game
- It is better if the user can choose whether to puzzle, quiz, or guess the picture
